

**Carleton University**  
**Department of Systems and Computer Engineering**  
**SYSC 3303 - Real-Time Concurrent Systems - Summer 2013**

**Assignment 4**

## **Part 1**

Select an article (newspaper, magazine, web, etc.) on a topic related to the course.

### **Submitting Your Choice**

Submit your choice of article to me via e-mail along with a link to the article or a copy of the article attached to the e-mail.

Due: Thursday, May 30th at 8pm SHARP!

## **Part 2**

Once your article has been approved, you are to write a summary of the article (3-5 pages is the recommended length). Some of the articles chosen will be discussed in class near the end of the course.

### **Submitting Your Summary**

Your summary (Assignment #4) is to be submitted electronically using the assignment "submit" program. Along with your summary, include a "README.txt" file explaining the names of your file(s), software used, etc.

Emailed submissions will not be accepted. See the course outline for the procedure to follow if illness causes you to miss the deadline.

### **Presenting in Class (Optional)**

Bonus marks will be awarded for giving a presentation of your paper in the lectures. If you would like to present your summary in a 10-15min time slot in class, please let me know via e-mail. If you have a preference as to the date you'd like to do the presentation (choice of June 10, 12, or 17th), please give your first and second choices.

### **Reminder**

The TAs will mark your assignments in the lab. It is your responsibility to ensure that any software required for viewing your files is also present in that lab.

Due: Tuesday, June 4th at 8pm SHARP!
